A.

L. S.

Cum forte animi causa Musea aliquot hujus urbis intrarem, inter spolia marina aliquanmultos Turbines Exoticos adverti, quorum alios Terrestres, alios aquæ dulcis sive Fluviatiles esse probe cognovi: sc. ex analogia nostrorum Anglicanorum olim a me editorum. Cum autem nemo quod sciam (non qui vel data opera de his rebus scripserunt, quod tamen ijs vitio vertendum est) hos a marinis distingueret, operæ pretium esse duxi, ut qui in nostris manibus haberentur (qui sunt non pauci) aliorumq. in hac urbe Musæis reperti sunt, ipse breviter enarrarem, literisq. et Chalcographiæ fideliter mandarem.

Virorum autem a quibus plerosq. mutuo accepi, ut par est, mentionem fecimus; ut non mea tantum ea de re, sed et publicæ gratiæ ijs merito agerentur. At præ cæteris laude dignus est D. G. Courtein, tam ob summam industriam, quâ hæc maximis impensis colligit, nitide reponit, diligenter servat: quam ob singularem suam humanitatem, quâ mihi aliisq. rerum nature inquisitoribus facilem aditum præstat, nobisq. è penu suo locupletissimo, libenter copiam facit hæc aliq. id genus delineandi describendiq.

Septuaginta autem et amplius Cochlearum Terrestrium genera (ut de Fluviatilibus nunc taceam) jam, edidi: adeo haud verum est, quod nuper alicui temerè visum est, Terram ad Testacea generanda aquis minus aptam esse: imo vix dubito quin Terrestres Cochleæ etiam Marinas specierum numero æquent: si non superent. At hæc, opinor, in causâ sunt, cur nonnulli aliter senserint: nimirum, Terrestres Cochleas, si Marinis referantur, magnitudine exiguas esse: Deinde harum testæ fere leves et tenues sunt, sc. propter expeditum motum,

et ne suis bestioliis nimio oneri sint; adeoq. brevi pereant et dissipantur: cum Marinæ propter plerarumq. crassitiem, vel extincto animali in ævum durent. Porro Marinæ Testæ continuis fluctibus in litus reijci solent: cumq. fere valide et crassæ sint, in unum locum assidue accumulantur; at hæc causa Terrestribus Cochleis deficit, unde non nisi sparsim inveniuntur, densiq. vepribus et sylvis maxime occultantur. His accedit, ex omni parte Orbis Marinas Cochleas ex industria, facile, et ex otio colligunt maris cujusq. accolæ et nautæ, at Terrestres non nisi raro et casu ex ulla transmarina regione nobis afferuntur, et propter difficultatem appulsus, et quod sylvæ et campi inter feros populos, imò mansuetos, Terræ certè continentis, non sine summo vitæ periculo adeantur, nedum perscrutentur. Quod autem Terrestres Cochleæ Marinis et colorum varietate et pulchritudine non cedant (idq. etiam contra quorundam sensum) ex descriptionibus nostris ut opinor abunde constabit. Præterea duo sunt, Lector, quæ te scire volui. Unum, ex his testis aliquot posse esse marinas: ejusq. adeo rei, ubi aliqua suspicio est, notam fere adpono. Alterum, in aliquibus colorem naturalem fere perijisse credibile esse, sc. ubi ex toto albidæ sunt; at mihi ex vivis rebus ijsve perfectis descriptiones concinnaße fas non fuit; hanc felicitatem aliis relinquo. Hæc autem pauca et exigua literarum commodo et incremento, maxime Historiæ Naturalis, cui vehementer studeo, litavi.
